

PHI CONTOUR

ABOUT THE TREATMENT

PHI CONTOUR IS A SKILL OF SEMI-PERMANENT MAKE UP FOR EYELINER, LIP & EYEBROW DRAWING, SCALP AND AREOLA PIGMENTATION.

THE SHAPE IS CALCULATED ACCORDING TO THE GOLDEN INTERSECTION (PHI 1.618) AND FACE MORPHOLOGY.

FOR THE LIPS & EYEBROWS THE SYMMETRY IS ACHIEVED THROUGH PHIBROWS APPLICATION AND IT IS CALCULATED WHILE THE CLIENTS' EYES ARE CLOSED, BECAUSE IN THAT WAY MIMETIC MUSCLES THAT CAN AFFECT EYEBROWS' SYMMETRY ARE RELAXED.

PHI CONTOUR OFFERS DIFFERENT TECHNIQUES TO CREATE (ACCORDING TO THE CLIENTS' DESIRES) MORE NATURAL OR SIGNIFICANT RESULTS.

ALL TREATMENTS ARE PERFORMED WITH STERILE, SINGLE USE HYGIENIC MODULES THAT OFFER THE CLIENTS THE HIGHEST AND SAFEST STANDARDS.

THE PHI CONTOUR PIGMENTS, THE MACHINE AND THE HYGIENIC MODULES ARE MADE IN GERMANY.

THE MACHINE GIVES US THE POSSIBILITY TO CHOOSE DIFFERENT NEEDLE CONFIGURATIONS – FOR EXAMPLE A VERY FINE NANO NEEDLE FOR FINEST EYEBROW STROKES OR DIFFERENT MULTIPLE NEEDLES FOR BIGGER AREAS, SUCH AS LIP SHADING OR AUREOLA PIGMENTATION.

THE TOUCH UP IS DONE A MONTH AFTER THE TREATMENT, BECAUSE AFTER THE REGENERATION OF THE SKIN THE COLOR RESULT WILL BE LIGHTER.

THE COLOR IS DARKER DURING THE FIRST 5 TO 7 DAYS. 7 DAYS LATER, IT LOSES 40 TO 50% OF ITS INTENSITY. IF YOU THINK THE COLOR IS TOO DARK, DO NOT TRY TO REMOVE IT YOURSELF BY NO MEANS. PATIENTLY WAIT 7 DAYS FOR THE COLOR TO FADE ON ITS OWN AFTER THE HEALING OF THE SKIN.

POST-TREATMENT FLOW MAKES 70% OF THE TREATMENT'S SUCCESS. CONSCIENTIOUSLY OBEY ADVICE. RINSING AND APPLYING CREAMS IS OF GREAT IMPORTANCE.

COLOR DURATION PRIMARILY DEPENDS ON HOW OILY THE SKIN IS. THE OILIER THE SKIN, THE SHORTER THE COLOR LASTS. SWEATING AND SUN EXPOSURE ALSO REDUCE COLOR FASTNESS.

ON AVERAGE, EXPECTED TIME UNTIL A NEW COLOR REFRESHMENT IS BETWEEN 1 AND 3 YEARS. WITH OILY SKIN IT IS UP TO 2 YEARS.

THE PAIN DURING THE TREATMENT IS RELATIVE. SCARED CLIENTS AND CLIENTS WHO HAVE THEIR PERIOD USUALLY FEEL STRONGER PAIN, WHILE THE OTHER CLIENTS COMPARE THE PAIN TO THE ONE THEY FEEL WHEN PLUCKING EYEBROWS. IT IS POSSIBLE TO USE MILD ANESTHETICS IN FORM OF CREAM OR LIQUID THAT CAN ENTIRELY ELIMINATE THE PAIN DURING THE TREATMENT.
