

PHICONTOUR

POST TREATMENT CARE

THERE IS THE SWELLING AFTER THE TREATMENT THAT LASTS FOR 24-48 HOURS (YOU CAN APPLY COLD COMPRESSES). COLOUR IS VERY INTENSE UNTIL THE LIPS PEEL OFF, USUALLY FOR 3-7 DAYS AFTER THE TREATMENT. DO NOT PEEL OFF THE SCABS, BECAUSE YOU WILL REMOVE THE PIGMENT WITH THEM.

DURING THE FIRST DAY, GENTLY CLEAN THE LIPS WITH WET COTTON PADS EVERY 30-60 MINUTES, WITHOUT RUBBING. JUST REMOVE THE LYMPH FROM THE LIPS TO PREVENT BIG SCABS FROM FORMING.

DURING THE FIRST 3 DAYS, APPLY ANTIBIOTICS OINTMENT 3 TIMES A DAY. IN BETWEEN USE VASELIN WITH PANTHENOL, EUCERIN LIP BALM OR SKIN CANDY (APPLY IN THIN LAYER).

AFTER 5 DAYS, APPLY THE CREAM WHEN NECESSARY SO THAT THE LIPS ARE NOT DRY AND TIGHT.

DURING THE FIRST 7 DAYS AVOID SAUNA, SWIMMING POOLS, MAKE-UP IN THE LIP AREA, SUN TANNING AND COSMETIC TREATMENTS.

IF NECESSARY, CORRECTION CAN BE DONE 3-4 WEEKS LATER, WHEN THE LIPS ARE FULLY REGENERATED.

LIPS REFRESHMENT CAN BE DONE ONCE A YEAR IF YOU WANT A MORE INTENSE COLOUR.

IN ORDER TO PRESERVE THE COLOUR FOR AS LONG AS POSSIBLE, USE CREAM OR LIP BALM WITH SPF WHEN SUN TANNING. WHEN IT COMES TO THE EYES, THE SWELLING APPEAR THE NEXT DAY. THIS IS WHY IT IS NECESSARY TO APPLY HEPATHROMBINE CREAM (CREAM THAT REDUCES THE SWELLING), BUT ON THE EYELINER – ONLY TO THE AREA UNDER THE EYES AND UNDER THE EYEBROWS.

DURING THE FIRST 2-3 DAYS, APPLY CHLORAMPHENICOL OINTMENT 3 TIMES A DAY. IF YOUR EYES ARE NOT SENSITIVE, YOU CAN USE SKIN CANDY ONLY. WASH YOU FACE GENTLY WITH NEUTRAL SOAP AND DO NOT RUB YOUR EYES.

AFTER 3 DAYS, APPLY THE CREAM ONLY WHEN NECESSARY.

COLOUR AND THE THICKNESS OF THE EYELINER ARE MORE INTENSE DURING THE FIRST FEW DAYS AFTER THE TREATMENT. AFTER THAT, YOU GET A MORE NATURAL LOOK.

DURING THE FIRST 7 DAYS AVOID:

- MAKE-UP
- SAUNA
- SWIMMING POOL
- GYM

IF YOU HAVE FACIAL TREATMENTS, PROTECT THE YES WITH COTTON PADS.

CORRECTION CAN BE DONE AFTER 3-4 WEEKS IF NECESSARY.
